FEATURED WORK

A real product.

Mumaken / ممكن

Ride-hailing rentals · Saudi Arabia

Putting 10,000+ drivers behind the wheel — without the down payment.

PROBLEM

In Saudi Arabia, ride-hailing drivers often can't access a car to work because rental companies demand large deposits and complex paperwork. The platforms (Uber, Careem) need verified drivers; the drivers need cars; the rental owners need trust.

APPROACH

I built Mumaken end-to-end as a Flutter app: low-friction onboarding, fleet browsing, instant rental requests, full insurance handling, and direct integration

with Uber/Careem driver accounts. Bloc for state, Firebase for auth and real-time data, REST APIs for the rental backend.

IMPACT

Live in Saudi Arabia with 10,000+ downloads on Google Play. Drivers can rent a car in minutes with zero down payment, full insurance included, and start earning the same day.

OTHER PROJECTS

More apps shipped

Production work for clients ranging from rentals to ERP to beauty services.

Production

أميال / Amyal

Car rentals · iOS + Android

Car rental marketplace where users can rent vehicles with or without a driver, browse by category, and book directly from the app. Built for the Saudi market.

Flutter

Bloc

Crystal Beauty — Customer

Beauty marketplace · iOS + Android

Beauty marketplace + booking app: browse salons and beauty experts for makeup, nails, and hair, with home or in-center service. Discover offers, book in a few taps, rate after the service.

Flutter

Cubit

Firebase

[▶ Play Store](#)[🍏 App Store](#)[▶ Play Store](#)[🍏 App Store](#)**Production**

Crystal Beauty — Provider

Salon & expert dashboard · iOS +
Android

Companion provider app for salons
and beauty experts to manage
services, prices, offers, schedules,
and incoming bookings. Same
architecture as the customer app.

[Flutter](#)[Cubit](#)[Firebase](#)[▶ Play Store](#)[🍏 App Store](#)**TRY IT YOURSELF**

A real Flutter state machine — driven by you.

This is the rental flow from Mumaken, modeled with Bloc. Trigger an
event, watch the state transition, see the event log update. Same
architecture I ship to production.

TESTIMONIALS

What people

"Khaled exceeded my expectations in every aspect of the project. His expertise in Flutter, problem-solving skills, and ability to turn ideas into a high-quality product were outstanding. He communicates clearly, meets deadlines, and always goes the extra mile to ensure the best results. I would definitely work with him again and highly recommend him to anyone looking for a top-tier mobile developer."

MY APPROACH

How I work.

A simple, repeatable process that ships great software.

01

Understand

Map the real problem, not the surface request

02

Architect

Choose state, structure, and trade-offs

03

Build

Ship a clean, testable foundation

04

Ship

Test, optimize, and deliver impact

EXPERIENCE

Where I'm

MAR 2023 — PRESENT

Flutter Developer

@ AAIT

Building production cross-platform apps used by tens of thousands of users across the Middle East.

- Shipped 15+ production apps across iOS and Android
- Mumaken: 10K+ users in Saudi Arabia, live ride-hailing rentals
- Built scalable Bloc/Cubit/Riverpod architectures
- Integrated REST APIs, Firebase, and 3rd-party services
- Reduced crash rates and improved performance metrics
- Implemented clean architecture in large-scale codebases

Have a Flutter project in mind?

I'm open to freelance work and full-time roles. Tell me what you're building — I usually reply within a day.
